

Change Exploration

Make a list of all people, places, or things that might be affected if your proposed change is. Consider how they will be affected, including the different kinds of costs (money, time, physical space, environmental) involved with change or with no change. Continue to review and fill in your chart as you research your issue and talk with more people in your community. You may want to re-create this document digitally.

Who/What could be affected	Positive aspects of change	Negative aspects of change
